

DEPARTMENT OF THE NAVY
OFFICE OF THE CHIEF OF NAVAL OPERATIONS
2000 NAVY PENTAGON
WASHINGTON, DC 20350-2000

IN REPLY REFER TO

and
Headquarters, United States Marine Corps OPNAVINST 8010.12F/MCO 8010.12
2 Navy Annex N411/CMC (ASL)
Washington, D.C. 20350-1775 28 March 2000

OPNAV INSTRUCTION 8010.12F/MCO 8010.12

From: Chief of Naval Operations
Commandant of the Marine Corps

Subj: NAVAL CONVENTIONAL ORDNANCE OPERATIONAL LOGISTICS POLICY

Ref: (a) DoD Instruction 3000.4 of 16 Jun 97
(b) OPNAVINST 8011.9A

Encl: (1) Draft Message Template for Standup of Crisis Response Cell (CRC)

1. Purpose. To define naval conventional ordnance operational logistics policy in support of operational plans (OPLANS), operational plans in concept form (CONPLANS), small scale contingencies (SSC) and other operational requirements. This instruction/order has been reviewed and sanctioned by the Naval Ordnance Readiness Improvement Process (NORIP). It has been completely revised and should be reviewed in its entirety.

2. Cancellation. OPNAVINST S8010.12E and Report Symbols OPNAV 8010-1B, 8010-C, 8010-1E, 8010-1F, 8010-1J and 8010-1K.

3. Scope. This instruction/order pertains to all categories of naval conventional ordnance, including sonobuoys and Marine Corps Class V (A) aviation ordnance. However, for Class V (W) ground ammunition managed by the U.S. Marine Corps, Marine Corps Systems Command (MARCORSYSCOM) (AM), for inventories owned by Commander, Naval Special Warfare Command (COMNAVSPECWARCOM) and the U.S. Coast Guard, it applies only to storage requirements. This instruction pertains to ordnance positioning and availability assessment during peacetime and repositioning, risk assessment and allocation during times of conflict. Within the context of this instruction/order, the following terms have the following applicability:

a. Naval ordnance means all Navy ammunition and Marine aviation ammunition.

b. Navy Commander in Chief (CINC) or Navy CINCs include the Commander in Chief U.S. Pacific Fleet (CINCPACFLT), Commander in Chief U.S. Atlantic Fleet (CINCLANTFLT), and Commander in Chief U.S. Naval Forces Europe (CINCUSNAVEUR).

c. Marine Force (MARFOR) or MARFORs include Commander, Marine Forces Pacific (COMMARFORPAC) and Commander, Marine Forces Atlantic (COMMARFORLANT).

d. Service components are those Navy and Marine Corps forces designated to conduct or support operations during a major theater war (MTW), SSC or military operation other than war (MOOTW).

e. The NORIP is a group of Naval ordnance stakeholders chartered by the Chief of Naval Operations (CNO) and Commandant of the Marine Corps (CMC) to improve naval ordnance readiness and sustainability.

4. Objectives.

a. Provide an overview of the Non-Nuclear Ordnance Requirements (NNOR) process.

b. Provide operational ordnance positioning policy to Navy CINCs and MARFORs and establish the Global Naval Ordnance Positioning Plan (GNOPP) as the process and methodology for optimally positioning and allocating naval ordnance.

c. Provide policy for the assessment of naval ordnance availability in the event of shortfalls.

d. Establish policy for a Crisis Response Center (CRC) to enable timely sourcing, distribution and expenditure reporting of Naval ordnance during an MTW, SSC or MOOTW as may be required.

e. Assign responsibilities and actions.

5. Non-Nuclear Ordnance Requirements Process Overview. The Capabilities Based Munitions Requirements (CBMR) process, directed by reference (a), requires each service to develop their portion of Department of Defense's (DoD) total munitions requirements during formulation of the Program Objectives Memorandum (POM). The Navy and Marine Corps component of the CBMR is the NNOR modeling process described in reference (b). The NNOR identifies ordnance shipfill, combat expenditures, maintenance pipeline and training, testing, and current operational requirements (TTCOR) required to accomplish the Navy and Marine Corps' forward

presence mission, and to execute the dual MTW scenario outlined in the Defense Planning Guidance. The output of the NNOR model provides the Department of the Navy's baseline input into the DoD Planning, Programming, and Budgeting System (PPBS).

6. Ordnance Positioning, Assessment and Allocation.

a. Naval ordnance positioning, planning and execution embodies a global perspective evolving and expanding in concert with development of a joint Navy/Marine Corps model identified as the GNOPP. The GNOPP provides for the distribution of ordnance to forward and continental United States (CONUS) sites based on Defense Planning Guidance and assessments of the most likely MTW/SSC scenarios. The GNOPP considers storage capacities, most efficient resupply of supported warfighters, and minimization of strategic lift requirements.

b. The GNOPP is the authorized naval ordnance positioning process. The GNOPP process model is governed by business rules/planning factors (shipfill, training, shore-based units, resupply) that prioritize and allocate available ordnance by mission and purpose. The Fleet CINCs and MARFORs are responsible for the GNOPP methodology and consolidation of warfighter, i.e. service components, inputs. The GNOPP model is managed by the Naval Ammunition Logistics Center (NAVAMMOLOGCEN) based on these inputs. The GNOPP will be issued annually as a 2-year plan in a formal Memorandum of Agreement (MOA) that is approved by CNO (N3/N5, N4) and CMC (A, CS Avn, PPO) by 30 September each year. The business rules can be modified to allow changes to global distribution as required by OPLAN/CONPLAN revisions.

c. Load plans shall be developed for all naval ammunition storage sites to include the GNOPP Fleet positioning plans plus additional storage requirements such as: 30,000 Series shipfill allowances, Cartridge Actuated Devices/Propellant Actuated Devices, Coast Guard and maintenance, etc. Load plans are an administrative tool for retail inventory management by individual storage activities. The load plan typically represents, for any item, the upper and lower limits that will be positioned at a storage activity. This reflects a balanced use of storage capacity for anticipated mission.

d. System interface between the GNOPP and the Conventional Ammunition Integrated Management System (CAIMS) shall be structured to provide identification of positioned ordnance by specific mission and priority. This interface shall further provide the capability to modify the priority on a real time basis. This will facilitate sourcing of ordnance and assessment of inventory compliance with GNOPP under alternate operational scenarios. Metrics and indicators shall be developed to measure inventory distribution compliance with the GNOPP.

e. During deliberate planning, each service's calculation of OPLAN munitions requirements are sourced and entered into the Joint Operational Planning and Execution System (JOPES) by the respective service component under the Unified CINC for each MTW. To ensure GNOPP business rules/planning factors reflect current operational strategies, inventory distribution assessments are required. The Navy CINCs, as logistics agents for naval forces, should conduct, in coordination with the MARFORs, periodic assessments of Unified CINC requirements in support of MTW, SSC, and MOOTW. These assessments compare Class V requirements against inventories and serve as the basis for sourcing ammunition and Time Phased Force and Deployment Data (TPFDD) planning and execution.

f. Emergent peacetime allocation issues, unresolvable between the NAVAMMOLOGCEN, Navy CINCs and MARFORs, that can only be satisfied by override of GNOPP allocation, shall be reviewed and adjudicated by CNO (N411) and CMC (ASL), with direction as necessary from CNO (N3/N5) and CMC (PP&O).

7. Crisis Response.

a. In the event of a crisis involving the unplanned deployment of naval forces or unexpected expenditure rate of naval ammunition (e.g., MTW or SSC), CNO (N411) and CMC (ASL) will determine the need to stand up a naval ammunition CRC at the NAVAMMOLOGCEN. CNO (N411) will notify Commander, Naval Supply Systems Command (94) of the need for a NAVAMMOLOGCEN CRC in support of conventional ordnance logistics operations. Enclosure (1) is a draft message template/letter of instruction (LOI). It will be issued (with necessary changes) by CNO (N411) to establish the NAVAMMOLOGCEN CRC. This message will include required direction and sourcing policy from CNO (N3/N5) and CMC (PP&O) applicable to the crisis. While activated, the NAVAMMOLOGCEN CRC will be under the operational control of CNO (N411).

b. If a requisition cannot be filled, NAVAMMOLOGCEN CRC will identify shortfalls and detail alternatives by fastest possible means and by a message to both CNO (N411) and CMC (ASL). CNO (N411) and CMC (ASL) (where applicable) will elevate shortfall issues to the appropriate headquarters staffs to assess and resolve the issue. CNO (N411), after consulting with CMC (ASL), will notify all concerned of the resolution decision via naval message. This decision process for resolution of ordnance allocation issues identified by the CRC during crisis action is depicted in figure 1.

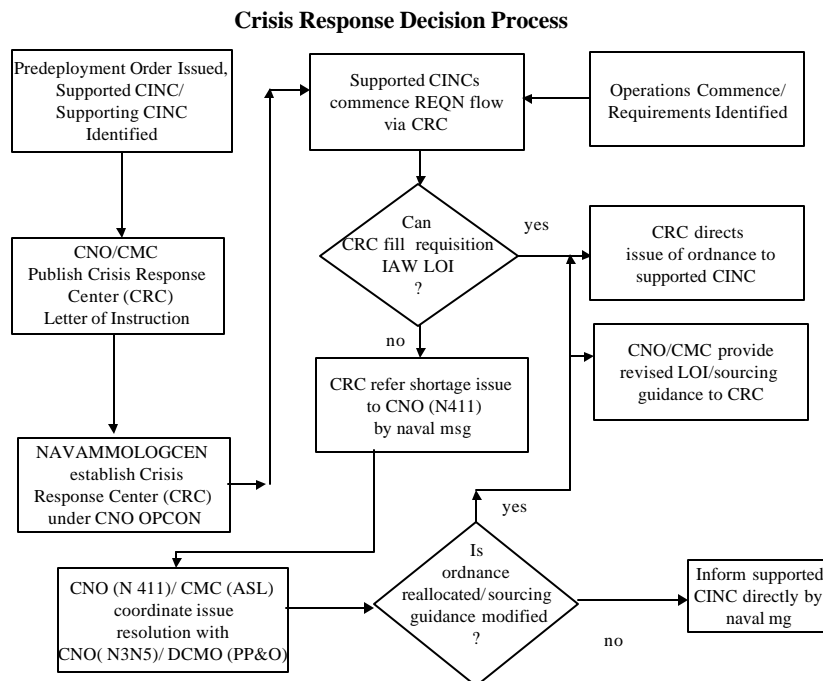

Figure 1.

c. At the end of hostilities, the CRC shall stand down at the direction of CNO (N411). Prior to stand down, the CRC will ensure a reconciliation of expenditures based on CAIMS data and theater Munitions Reports (MUREP) is complete. NAVAMMOLOGCEN shall provide to CNO (N411)/CMC (ASL) the recommended plan for reallocation of any excess weapons in the theater of operations and payback of ordnance to other services (if required). This plan should include a proposal to replenish war reserve stocks of ashore and afloat units involved in the conflict, and take into account requirements for Atlantic and Pacific-based ship deployment schedules. Once approved by CNO (N411) and CMC (ASL), the reallocation plan will be presented to CNO (N3/N5) and CMC (PP&O) for approval. Following approval, the NAVAMMOLOGCEN will ensure expeditious redistribution of available assets to meet global requirements.

8. Summary of Actions and Responsibilities

a. CNO and CMC headquarters staffs

(1) Provide ordnance logistics guidance and policy to Navy CINCs and MARFORs in support of the respective Unified CINCs during the deliberate planning process. (N4) (DC, AVN)

(2) Coordinate with Navy CINCs, MARFORs and other major claimants to obtain accurate input to the NNOR and ensure TTCOR are submitted. (N81)(ASL, APW)

(3) Pass TTCOR inputs to NAVAMMOLOGCEN and resource sponsors for development of the CNO and CMC-approved Non-Combat Expenditure Allocation (NCEA). (N81)(ASL) (Resource Sponsors)

(4) Annually approve and promulgate NCEA to the Navy CINCs, including MARFORs, and other major claimants for further distribution to the naval forces. (N411)(ASL, APW)

(5) Resolve Class V materiel shortfalls identified during the deliberate planning process. (N411) (ASL)

(6) In the event of crisis, standup the CRC and publish the LOI. (N411)

b. Navy CINCs and MARFORs (Commander, United States Naval Forces Central Command, where applicable.)

(1) Participate in annual GNOPP update conferences to:

(a) Coordinate within the GNOPP charter and with NAVAMMOLOGCEN to develop positioning actions to meet OPLAN requirements, minimize risks associated with ordnance shortfalls, and facilitate TPFDD execution.

(b) Develop, or revise as necessary, business rules for the GNOPP based on precise planning factors including: shipfill/beddown; OPLAN and training requirements; storage activities and capacity; and resupply lead-times.

(c) Resolve deliberate planning, crisis action planning, positioning plan development, load planning and ordnance positioning strategy issues. If unable to do so, address problem areas to CNO/CMC for resolution.

(2) Obtain validated OPLAN ordnance requirements from the respective service components. Coordinate with service components and NAVAMMOLOGCEN regarding naval ammunition sourcing, identification of shortfalls, and completion of the TPFDD during the deliberate planning process.

(3) Conduct periodic assessments of Unified CINC requirements in support of MTW, SSC and MOOTW

(4) Coordinate with NAVAMMOLOGCEN when attempting to satisfy Class V naval ammunition shortfalls that can not be filled from assets held at primary or secondary naval stock points within the area of responsibility (AOR).

(5) Submit to the Commanding Officer, NAVAMMOLOGCEN:

(a) Space Utilization and Storage of Explosive/Inert Ammunition Report and Magazine Hazard Class Capacity Report to support new production and rework allocations (including NCEA stocks).

(b) Proposed changes to 30,000 series allowance lists for shipfill, mission loads, and cargo loads based on CNO/CMC approved combat requirements, with a copy to CNO (N815), and CMC (ASL).

(c) Inputs (revisions to business rules/planning factors) for the GNOPP in support of Unified CINC OPLANs/CONPLANs and other contingency requirements. Submit copies to NAVAMMOLOGCEN via CNO (N411) and CMC (ASL).

(6) Develop tailored allowance lists from which afloat activities will submit requisitions to meet Unified CINC requirements.

(7) Submit training requirement component of the TTCOR to CNO (N81) by 1 October each year for development of the NCEA.

(8) Manage load plans for all storage activities in respective AOR and coordinate replenishment/redistribution required to correct load plan deficiencies (shortages/excess) with the NAVAMMOLOGCEN.

(9) Optimize employment of Opportune Lift (OPLIFT) as necessary to effect positioning/load plan compliance and to support Class V materiel rollback.

c. NAVAMMOLOGCEN

(1) Develop, update and manage the GNOPP model utilizing inputs from Navy CINCS, MARFORS and MARCORSYSCOM AM (for USMC ground ammunition). Identify ordnance requiring positioning and publish a 2-year positioning plan. The plan will be updated annually when changes are identified via positioning conferences and the GNOPP MOA.

(2) Compute and publish load plans for all naval ammunition storage activities.

(3) Schedule and coordinate annual GNOPP Update Conferences.

(4) Publish and issue shipfill, mission and cargo load allowance lists.

(5) Coordinate and assist Navy CINCs and MARFORs in developing 30,000 series allowance lists.

(6) Coordinate development of ordnance distribution plans, based on GNOPP positioning/load plans, with the Navy CINCs and MARFORs. Identify ordnance positioned in support of GNOPP by specific mission and priority.

(7) Develop metrics to measure ordnance distribution compliance relative to the GNOPP allocation and magazine utilization. Incorporate metrics into the NAVAMMOLOGCEN Ordnance Assessment Portfolio (OAP).

(8) Incorporate ordnance inventory readiness metrics into the NAVAMMOLOGCEN OAP based on standardized readiness definitions and assumptions provided by the Navy CINCs and MARFORs and coordinated/reviewed by the NORIP.

(9) Assist Navy CINCs and MARFORs in the management of load plans by coordinating the ordnance replenishment and redistribution.

(10) Act as Department of the Navy single point of contact for coordination with the Joint Munitions Transportation Coordinating Agency (JMTCA) for the Single Manager for Conventional Ammunition (SMCA) and non-SMCA common-user ammunition movement requirements other than Class V (W) ground ammunition. Provide data required to complete deliberate planning, crisis action planning used to facilitate United States Transportation Command (USTRANSCOM) feasibility analyses.

(11) Coordinate sourcing for SMCA-held assets.

(12) Advise CNO (N411), CMC (ASL) AND MARCORSYSCOM (AM) of changes or impending changes in ashore ordnance storage capacities.

(13) Provide new production and rework schedules and allocation summaries to Navy CINCs and MARFORs. Provide a copy to CNO (N411) and CMC (ASL).

(14) Ensure ordnance automated management systems are kept current with industry technology standards and are able to accommodate changes in a timely manner.

(15) When directed, stand up a CRC to enable timely sourcing, distribution and accurate expenditure reporting of naval ordnance.

d. Program Manager/Acquisition Agents

(1) Provide testing requirement (e.g. flight clearance, quality assurance, quality surveillance) component of the TTCOR to CNO (N81) and CMC (ASL) by 1 October each year.

(2) Provide new production and rework delivery schedules to the NAVAMMOLOGCEN with timely updates to reflect changes.

e. MARCORSYSCOM (AM), COMNAVSPECWARCOM and Commandant of the U.S. Coast Guard establish and provide ammunition storage requirements to the respective Navy CINC and NAVAMMOLOGCEN for inclusion in GNOPP and designated activity load plans.

9. Reports

a. NAVAMMOLOGCEN Annual magazine utilization report to CNO (N411)

b. NAVAMMOLOGCEN Semi-Annual ordnance distribution GNOPP compliance report to CNO (N411). (Reporting requirement will be eliminated, when metrics are available on NAVAMMOLOGCEN Web site based OAP)

c. The reporting requirements contained in this instruction are exempt from reports control per SECNAVINST 5214.2B, MCOP5215.1G and MCO5215.20.

NARR/REF A PROVIDES OPERATIONAL GUIDANCE WRT SUPPORTED CINC AND SUPPORTING CINCS. REF B PROVIDES PROCEDURES FOR REPORTING CLASS V (A) AMMUNITION TRANSACTIONS. REF C PROVIDES POLICY AND GUIDANCE FOR BOTH SUPPORTED AND SUPPORTING NAVAL COMMANDS ACTIVITIES. REF D PROVIDES GUIDANCE FOR TRANSPORTATION AND STORAGE OF AMMUNITION ASHORE. REF E IDENTIFIES PROCEDURES FOR RECEIPT, SEGREGATION, STORAGE AND ISSUE OF AMMUNITION AT SHORE FACILITIES. REF F PROVIDES PROCEDURES FOR RECEIPT, SEGREGATION, STORAGE AND ISSUE FOR AFLOAT AND SECONDARY UNITS.//

RMKS/1. (CLASSIFICATION) PURPOSE: THIS MESSAGE DIRECTS STANDUP OF A CRISIS RESPONSE CENTER(CRC) AT THE NAVAL AMMUNITION LOGISTICS CENTER MECHANICSBURG, PA, TO SUPPORT THE NAVY COMPONENT COMMAND (NCC), AND SUPPORTED MARINE FORCES COMPONENT COMMAND (MFCC) IN PROVIDING ORDNANCE TO CONDUCT OPERATION XXXXXX. THE CRC WILL OPERATE UNDER THE DIRECT OPERATIONAL CONTROL OF OPNAV N411 AND WILL PROVIDE DAILY REPORTS VIA NAVAL MESSAGE/SECURE EMAIL REGARDING THE STATUS OF URGENTLY REQUIRED MATERIAL. THIS HAS BEEN COORDINATED WITH, HQMC (ASL-30), CINCLANTFLT (N41), CINCPACFLT (N42), CINCUSNAVEUR (N41), COMMARFORLANT (ALD), AND COMMARFORPAC (ALD).

2. (U/C/S) SUMMARY: AS DIRECTED BY REF A, THE SUPPORTED CINC IS (AS ASSIGNED) WITH CINC JOINT FORCES COMMAND CINC PACOM AND CINC USTRANSCOM AS SUPPORTING CINCS. ADDITIONALLY, MILITARY SERVICES AND OTHER DODAGENCIES WILL RENDER ASSISTANCE AS MAY BE REQUIRED. REF A ALSO PROVIDES THE FOLLOWING INFORMATION RELATIVE TO LOGISTICS:

- A. PROJECT CODE/ (AS ASSIGNED)
- B. FUNDING RESPONSIBILITY/ (AS ASSIGNED)
- C. THE FOLLOWING APPLIES://
 - (1) SUPPORTED NCC/
 - (2) SUPPORTED MFCC/

(3) SUPPORTED LOGISTICS AGENT/

(4) ALL OTHERS NOT MENTIONED ABOVE ARE CONSIDERED TO HAVE SUPPORTING ROLES AND RESPONSIBILITIES TO ENSURE REQUIREMENTS ARE FILLED IN AN EFFICIENT AND COST EFFECTIVE MANNER.

3. (U/C/S) SITUATION. US NAVAL FORCES ARE TO PARTICIPATE IN OPERATION _____ IN CONCERT WITH (OBTAIN DETAILED LANGUAGE FROM EITHER CJCS OR SUPPORTED CINC MESSAGE PERTAINING TO THE OPERATION/EXERCISE.)

4. (U/C/S) MISSION. WHEN DIRECTED, NAVAL FORCES WILL CONDUCT MILITARY OPERATIONS AIMED AT FACILITATING THE ACHIEVEMENT OF THE DESIRED POLITICAL/MILITARY (MIL/POL) END STATE (OBTAIN FROM EITHER CJCS OR SUPPORTED CINC MESSAGE REGARDING THE OPERATION/EXERCISE).

5. (U/C/S) EXECUTION. UPON NOTIFICATION, NAVAL FORCES WILL LAUNCH STRIKE OPERATIONS ISO (OPERATION/EXERCISE). IDENTIFICATION OF ORDNANCE REQUIREMENTS FOR PROSECUTING INITIAL STRIKE PACKAGES AND FOLLOW ON FORCE SUSTAINMENT ARE THE RESPONSIBILITY OF THE SUPPORTED CINC VIA THE ASSIGNED NCC AND MFCC.

6. (U/C/S) ORDNANCE SOURCING POLICY: SUPPORTING CINCS ARE REQUIRED TO MAINTAIN STOCKS FOR OTHER CURRENT AND FUTURE OPERATIONS. UNTIL OTHERWISE DIRECTED, SOURCING POLICY AND GUIDANCE IS DEFINED AS FOLLOWS:

DETAILED SOURCING POLICY AND GUIDANCE WILL BE DEVELOPED BY CNO/CMC BASED ON PREVAILING POLITICAL/THREAT CONDITIONS EXISTING WHEN THE CRISIS OCCURS AND SPECIFIED IN THIS PARAGRAPH IN A FORMAT SIMILAR TO THIS SAMPLE:

(1) CINCLANTFLT: 2 CVBG SHIPFILLS PLUS 2 ARG SHIPFILLS NOT INCLUDING UNITS CURRENTLY DEPLOYED (LIST)

(2) CINCPACFLT: XXXXXXXXXXXXXXXX

(3) CINCUSNAVEUR: XXXXXXXXXXXXXXXX

(4) COMARFORLANT: XXXXXXXXXXXXXXXX

(5) COMARFORPAC: XXXXXXXXXXXXXXXX

(6) MPF SHIPS:

(7) TREATY STOCKS IN PLACE IN NORWAY, KOREA, ETC.

7. (U/C/S) ADMINISTRATION. THE CRC WILL NOTIFY ALCON WHEN FULLY OPERATIONAL BY NAVAL MESSAGE AND PROVIDE AMPLIFYING INFORMATION TO DELINEATE ROLES AND RESPONSIBILITIES FOR RESPONSIVE PROCESSING AND INTENSIVE MANAGEMENT OF ORDNANCE REQUISITIONS, MATERIAL SOURCING AND DELIVERY STATUS.
